Big plot consisting of two parcels - S'Espinagar

In a fantastically beautiful area in the east of Mallorca lies this extensive building plot with distant sea views. The well-known villages of Felanitx and Manacor and the small harbour towns of Porto Colom and Porto Cristo are in the immediate vicinity. On nearly 86,400 m² of land with mature trees, shrubs and plants, nothing stands in the way of realising your dream of your own property on the island Mallorca. The land consists of two separate plots next to each other, so that two country houses with a maximum area of 900 m³ each and a pool can be built. Manacor, situated in the east of the island, is the third largest independent municipality of Majorca, the second largest town and at the same time agricultural center of the east of the island.

The coat of arms contains a hand and a heart and this is what the name Man-a-Cor stands for "Hand on the heart". The history of this town goes through the Moorish and Roman settlement periods back to the prehistoric times.
