Fantastic building plot on hilltop

On a hill with a panoramic view, you can build your detached house with up to 450m² built area and thus enthrone on the top of a mountain. Almost 4,2 hectares of land will be between Montuiri and Porreres, where there is already a well, approx. 300m² of existing buildings and 2 caves. The view of the village of Montuiri is breathtaking, as well as the panoramic view of the mountain range and the surrounding countryside.

The buyer does not pay a broker's commission.

Montuiri was built on and around the hill on which highest spots there are flour mills, seen already from a distance. In the partly steep and narrow alleys there is everything you might need, bakery, banks, household article shops. If you wish to eat the typical Mallorquine -Pa amb oli- you should visit the restaurant S Hostal. Here you sit in front of the bar, under a giant rubber tree together with farmers, bankers and other trippers. Montuiri is one of the oldest localities on Mallorca.
